

Muneeb Ur Rehman

w w w . m u n e e b u r r e h m a n . d e v

AI Engineer | Experienced in Computer Vision & Natural Language Processing | Specialization in Data Analysis & Blockchain

PROFILE

Aspiring Artificial Intelligence student at Bahria University Karachi Campus with hands-on experience building and deploying AI applications in computer vision, natural language processing, retrieval-augmented generation (RAG), and data analytics. Experienced in developing production-oriented systems using machine learning frameworks, vector databases, FastAPI, Docker, and cloud platforms. Skilled in designing data pipelines, fine-tuning and evaluating AI models, and integrating AI solutions into user-facing applications.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL

AI & ML: Deep Learning (CNNs), Retrieval-Augmented Generation (RAG), Transfer Learning, Transformers (LLMs/VLMs/ViTs), Parameter-Efficient Fine-Tuning (LoRA/QLoRA)

Libraries: PyTorch, TensorFlow, Scikit-Learn, Peft, Polars, NumPy, LangChain, FastAPI, MLflow, DuckDB, Playwright, Seaborn

Tools & Platforms: Snakemake, Linux, Google AppSheet, Microsoft SQL Server, PowerBI, MongoDB Atlas, Apache Parquet, Git/GitHub, Docker, Kubernetes, Azure Web Service

EDUCATION

Bachelor of Science in Artificial Intelligence

Bahria University, Karachi Campus

- Currently in 7th semester, *CGPA* $\approx$ 3.3/4.0

Intermediate – Pre-Engineering

Bahria College Karsaz (Karachi Board)

- Graduated with Grade A

CERTIFICATIONS

- **Advanced Data Analytics** – Google
- **DevOps to MLOps Bootcamp** – Packt
- **Model Context Protocol: Advanced Topics** – Anthropic
- **Blockchain Specialization** – State University of New York & University at Buffalo

PROJECTS

Zero-Shot Anime Character Detection & Recognition | *DEIMv2, DINO v3, LanceDB*

- Developed a zero-shot anime character detection, recognition, and re-identification platform for images and videos, leveraging DEIMv2 for detection, DINOv3 embeddings for identity matching and a vector database search for persistent character recognition without retraining.

Transformer Adaptation Benchmarking | *PyTorch, DINO v3, MLflow*

- Demonstrated that parameter-efficient LoRA adaptation outperforms full fine-tuning on a 300M-parameter ViT in low-data regimes, achieving higher accuracy and better generalization across 26 fine-grained classes

LLM Style Transfer | *Peft, Unsloth, Langchain*

- Fine-tuned an open-source LLM using QLoRA to emulate Gollum's speech patterns, vocabulary, and conversational style from *The Lord of the Rings* while maintaining coherent and context-aware responses.

University AI Chatbot | *MongoDB Atlas, LangChain, Sentence Transformers*

- Built and deployed a RAG-powered university chatbot with async FastAPI backend, MongoDB vector search, JWT authentication, and LLM inference to automate rulebook-based student queries.

Large-Scale Data Analysis | *DuckDB, Scikit-Learn, XGBoost*

- Processed 40M+ records to build a hybrid taxi fare prediction system that separates deterministic pricing logic from stochastic variables and uses a stacked ensemble model pipeline with minimal user input.

WORK EXPERIENCE

Arts Team Head (*BUKC ACCP Club*)

- Oversaw creative direction and ensured timely event delivery.

Private Tutor (2022 – 2026)

- Tutored students from Grade 5 to 11 in Math, Science, and Computer, focusing on concept mastery and problem-solving skills.
